

Rainbow Trampolines

A large black trampoline with a safety net and a basketball hoop is set up on a green lawn in front of a house. Four children are playing on the trampoline. Our Safety Features: Spring-less Trampoline

We use Aviation Aluminum Rods that provide a nice sturdy bounce that is more durable. Using these rods keeps the jumping surface away from the steel frame. These rods are attached with a supplied tool to ensure a secure hold by clipping into the bed.

Our Safety Features: Aluminum Rods & Steel Frame

Rainbow Trampolines use Aluminum Rods that are inserted into the Metal Frame to support the net which is fastened to the jumping mat with a zipper for easy installation.

Our Safety Features: Safety Net

Rainbow Trampoline Safety Net is much more rigid & solid from being held tighter with Metal Rods helping to create a safe bouncing area. Our Safety Net simply zips onto the jump surface; making it much easier to install & replace.

Our Safety Features: Access Ladder

Rainbow Trampoline Access Ladder is made from the same Aviation Aluminum creating a sturdy & supportive ladder. Our Access Ladder is attached to the base of the trampoline preventing it from falling off while moving or jumping.
